PROFESSIONAL SUMMARY

Adaptable System & Web Developer with almost 4 years of hands-on experience in software development, system enhancement, database management, and technical support. Proven track record of delivering end-to-end solutions for key enterprise and government initiatives (such as MOF and SME Corp Malaysia) using HTML, CSS, JavaScript, MSSQL, Java, and REST API integrations. Experienced across the full Software Development Life Cycle (SDLC), actively contributing to requirements gathering, SPRINT sessions, User Acceptance Testing (UAT), and report design. Demonstrates continuous upskilling in modern technologies, including AI development tools and enterprise REST APIs. Dedicated to ensuring minimal downtime, optimizing database operations, and providing reliable tier-2/3 system support.

CORE EXPERTISE

- Full Software Development Life Cycle (SDLC)
 - Front-End & Web System Development (HTML, CSS, JavaScript)
 - Database Administration & Stored Procedures
 - REST API Integration
 - System Maintenance & Technical Support
 - User Acceptance Testing (UAT) & Sprint Planning
 - Report Design & Module Customization
 - Cross-Border Technical Collaboration
-

NOTABLE ACHIEVEMENTS

- Successfully delivered and integrated key government modules (such as SPA, SPS, and MyBPI), unifying systems into enterprise ERP portals like Government Resource Planning (GRP).
 - Optimized core database operations by writing and tuning MSSQL stored procedures, effectively minimizing manual data-handling errors and system friction.
 - Expanded technical expertise into AI and modern APIs by completing specialized coursework in Claude API, Claude Code, and Acumatica REST/ODATA frameworks.
-

WORK EXPERIENCE

Developer

Oct 2022 – Present

Century Software (M) Sdn. Bhd.

- Engineered, enhanced, and deployed responsive web application front-ends across multiple concurrent government and enterprise projects using HTML, CSS, JavaScript, and Java, optimizing markup structure and layout for cross-browser compatibility.
- Delivered tier-2/3 technical support and system maintenance during warranty and operational phases, maintaining minimal application downtime.
- Built and integrated REST APIs linking front-end UI components with backend ERP databases, enabling real-time data exchange between enterprise systems (GRP) and specialized platforms such as Sistem Pengurusan Aset (SPA).
- Formulated and optimized MSSQL stored procedures to manage critical data workflows and ensure backend operational stability.
- Partnered with cross-functional teams, end-users, and international partners through SPRINT planning and UAT sessions to align technical deliverables with client needs.

IT Helpdesk

Aug 2022 – Oct 2022

Startek (Aegis BPO Malaysia Sdn. Bhd.)

- Provided phone-based technical support to end-users across high-volume ticketing queues, consistently meeting core SLA targets.

- Tracked, logged, and categorized user inquiries within the ticketing platform, maintaining accurate records to preserve SLA resolution integrity.
- Managed issue escalations to senior support tiers, providing clear documentation for seamless handovers and faster resolution.
- Translated user-reported problems into structured technical logs to accelerate escalation handling and reduce resolution time.
- Maintained strong first-contact resolution performance, consistently aligning with service delivery expectations in a high-volume support environment.

Web Admin Intern

Oct 2021 – Apr 2022

Yata Jasa Media Sdn. Bhd.

- Designed and developed responsive front-end interfaces using clean, well-structured HTML and CSS, ensuring consistent layout across screen sizes and browsers.
- Maintained company website infrastructure and performed routine content updates while verifying cross-browser compatibility.
- Executed sanity and visual testing on updated web pages across multiple browsers prior to live deployment.
- Recorded basic operational workflows for web administration tasks.
- Optimized front-end components and page layouts to align with UX best practices, translating business needs into high-usability, accessible interface designs.

PROJECT EXPERIENCE

- **MOF MyResults | Developer:** Maintained and enhanced existing government web application modules, delivering new feature releases and continuous production support.
- **Sistem Pengurusan Aset (SPA) (2023–2025) | Developer:** Developed end-to-end asset modules on a low-code platform and integrated REST APIs to link ERP infrastructure with SPA.
- **Sistem Pengurusan Stor (SPS) (2023–2025) | Developer / Support:** Maintained backend data structures using MSSQL and resolved operational tickets reported via the internal logging system.
- **Projek SME Rating & Accreditation MyBPI (2024–2025) | Developer:** Built and maintained modules across the SDLC using HTML, CSS, JSON, and SQL through full Sprint and UAT lifecycles.
- **eClaims (2025–2026) | Developer:** Developed core modules (HTML, CSS, JSON, SQL) backing enterprise claims processing workflows.
- **Government Resource Planning (GRP) | Developer:** Integrated and managed unified enterprise portal modules connecting various underlying operational software systems.

EDUCATION

Bachelor of Computer Science (Software Development) with Honors | Universiti Sultan Zainal Abidin

2018 – 2022

CERTIFICATIONS & TRAINING

Technical Certifications & Courses

- Claude Code in Action
- Building With Claude API
- Acumatica REST API Developer
- Acumatica ODATA Developer

TECHNICAL & SOFTWARE SKILLS

Development & Frameworks: HTML5, CSS3, JavaScript, Java, C#, JSON, REST API, ODATA.

Databases: MSSQL, SQL, SQLite, Firebase

Tools & IDEs: VS Code, Visual Studio 2022, Postman, Acumatica, Claude Code, Android Studio, JIRA.

Reporting Tools: Microsoft Report Builder, Jasper Report.

Devops: Github, Azure Devops
